眼镜框铰链热置技术

本项工艺技术采取双程动作 ,自动连续地将铰链热置于眼镜框的左右两侧 ,交叉进行 ,节省工时。加工过程中钻孔、加热、铰链热置均可自动完成。铰链距离、深浅、加热时间长短、铰链倾斜角度可任意调节。为提高热置铰链的质量 ,亦可根据需要采用手动方式进行单独动作。调整维修方便。

该工艺技术先进 ,热置铰链装置质量可靠 ,优于国外同类设备。产品合格率可达 99 % 以上。采用本项技术可制造多种规格产品。本项工艺与传统工艺相比 ,不但生产效率大大提高 ,而且可减少返修 ,节约费用 ,降低成本 ,经济效益十分明显。
